

Lisa Pitter, PA-C and the staff at the office of Dr. Ariel Ostad MD PC not only provide professional, caring, and timely service, but also provide follow-up care that is very impressive in today's medical industry. I am a skin cancer patient who visits their office routinely and receives on-going treatments month after month. Through the numerous procedures I underwent, the staff never fell short of being efficient, approachable and truly concerned about my well-being. Lisa's standard of excellence creates a level of confidence within me that I would not hesitate to highly recommend her and this office.
